

The University of Siena is very pleased to announce the latest edition of its cutting edge workshop dedicated to Academic and Industrial researchers:

the **11th European Workshop in Drug Design**

First in this kind, this has always been a unique opportunity for graduate students, postdocs and scientists from both Academia and Pharma Industry to acquire a broader picture of new advances in the field of Molecular Modelling and Drug Design. Lectures from leading experts as well as the discussion of scientific outcomes through oral or poster presentations will create an **exciting and collaborative environment** that will give important networking opportunities. Afternoon sessions of **highly interactive hands-on case studies** will allow to learn more about computational techniques and softwares through direct experience.

The XI edition of the EWDD will be held between the **21st and the 26th May 2017** in the beautiful setting of the **Certosa di Pontignano**, Siena (Italy): a monastic complex in the heart of the Chianti and Tuscany where participants will be delighted to celebrate computer-aided drug design and discovery looking at an impressive sight of the city of Siena and enjoying Italian hospitality.

The scientific program will focus on the **latest developments** and **“hot topics” in computer-aided drug design**, covering a diverse range of methods. Particular attention will be put on:

- ✓ **Big data management,**
- ✓ **Novel tools in bioinformatics**
- ✓ **Use of free online tools**
- ✓ **Latest advances in MD simulations**
- ✓ **and much more...**

So, don't miss the XI EWDD!

Fix the date in your calendar and come to share you passion for Drug Design and *contribute to make this edition of the EWDD the best yet!*
